BACKGROUND OF THE SCHEME

Prime Minister of Pakistan in a meeting on the subject “Enhancing profitability by increasing productivity of crops” held in 30th October 2019, took a briefing on three major crops i.e. Rice, Wheat & Sugarcane.

Ministry of National Food Security & Research (MNFS & R) highlighted the reasons for low productivity of crops and further briefed that Agriculture is back bone of the economy & has huge export potential but its share is declining continuously. There are huge prospects of enhancing profitability of farmers by increasing productivity of major crops.

The prime Minister approved the initiatives of the Ministry of National Food Security & Research regarding increase in yield of major crops & boost adoption of Oilseeds through:

- Productivity Enhancement of Rice
- Productivity Enhancement of wheat
- Productivity Enhancement of Sugarcane
- National Oil seed Enhancement Program

These initiatives would supplement the efforts of Government of Pakistan & Government of Punjab to improve productivity of crops including Rice, wheat, Sugarcane and Oil seeds.

Fulfillment of food needs of the ever-increasing population of the country at an annual growth rate of 2.4% is also a matter of concern for the sitting government. It is also of worth mentioning that while population density is increasing and land to man ratio is reducing day by day putting huge pressure on agriculture sector. At present, 91% of the farmers of the Punjab province are having land holding <5 ha and practicing subsistence farming, just to maintain their bread butter without any profit.

Rice is an important cash crop as well as country’s main staple food after wheat. Its consumption rate is about 0.99 kg/ person/ month. After wheat, it is the second main staple food crop and second major exportable commodity after cotton. In Punjab, Rice is being grown on an area of 1.924 million hectare with production of 3.992 million metric tons and average yield of 2,075 kg / ha of cleaned rice during 2018-19 (Economic Survey of Pakistan 2017-18).

The yield gap between progressive and average farmer exists due to less adoption of certified and quality seed, delayed transplanting of nursery, imbalanced use of Micronutrients, lesser use of micronutrients, lack of awareness about weed and pest management and non-adoption of innovative technologies like mechanical methods of cultivation.

Micronutrients is strategic inputs in agriculture, it plays major role in production enhancement of agriculture crops. But unfortunately, the prices of Micronutrients are beyond the financial limits of farming community, considering this fact, under the project, it has been planned to provide subsidy on micronutrients. The proposed subsidy will enhance productivity of the crop. Therefore, Govt.of Punjab intends to launch a direct subsidy program in which Subsidy will be given to all eligible farmers (up to maximum 5 acres) in

selected district of rice through Pre-Paid Vouchers on Zinc @ Rs. 800 per acre (i.e Rs. 400 / 5-Kgs bag of Zinc Sulphate 21% or Rs. 400 / 3-Kgs bag of Zinc Sulphate 33% or Rs. 800 / 7.5-Kgs bag of Zinc Sulphate 27%). This subsidy amount will be reviewed from time to time by Agriculture Department's committee constituted under the chairmanship of Secretary Agriculture Punjab.
